Statement of Reasons for Allowance

1. In the office action mailed 12/8/03, the examiner rejected all the pending claims under 35 USC 103. In response, applicants have cancelled pending claims 1, 3-4, 8-11, and 13-15 and amended claim 7.

Thus, the present claim is allowable over the "closest" prior art JP 55139741, EP 130789, and Keaveney et al. (U.S. 5,114,479) for the following reasons:

JP 55139471 discloses ink jet recording method comprising ejecting ink onto recording medium wherein the ink comprises colored polymer dispersed in aqueous medium wherein the colored polymer comprises acrylic polymer and disperse dye wherein the dye is dispersed in the polymer followed by heating. However, there is no disclosure or suggestion that the ink comprises glycerol or ethylene glycol as now required in the present claim. Further, there is no disclosure of the minimum film forming temperature of the acrylic polymer as required in the present claim.

EP 130789 discloses ink jet recording method comprising ejecting ink onto recording medium wherein the ink comprises colored acrylic polymer dispersed in aqueous medium. It is further disclosed that the ink comprises drying property adjusting agent such as glycerol or ethylene glycol. However, EP 130789 discloses the use of basic dye which is in direct contrast to the present claim that requires oil soluble dye or disperse dye. Further, there is no disclosure in EP 130789 that the dye is sublimed and penetrated into the acrylic polymer as required in the present claim.

Keaveney et al. disclose ink comprising oil-soluble dye or disperse dye in acrylic latex wherein the latex is dyed by adding dye to latex and then heating with mixing. However,

Art Unit: 1714

Keaveney et al. is drawn to gravure or flexographic ink and thus, there is no disclosure or suggestion of ink jet recording method as required in the present claim. Further, there is no disclosure or suggestion that the ink comprises glycerol or ethylene glycol as now required in the present claim.

Thus, it is clear that JP 55139741, EP 130789, and Keaveney et al., either alone or in combination, do not disclose or suggest the present claim.

In light of the above, it is clear that the rejections of record are untenable and so the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
